

# Special Issue für Seminare und Abschlussarbeiten: Strategic IT-Management: Define HILTI's Future of Work

## 1. Investigating future working and collaboration solutions

- The increasing trend of remote working has certainly impacted the collaboration in our day to day operations
- The availability of wide range of novel remote collaboration solutions provides us an unprecedented opportunity to discover what is the best way to close the physical barriers using technology.

## 2. Overcoming the problem of remote work and collaboration

- Translating physical interaction virtually requires the consideration of how such information interacts e.g. two users in two different mediums may need solutions that interact differently with the same content.
- The unprecedented opportunities of data collection via online to realize close-to-life interactions in remote work and collaboration may raise potential privacy problem
